Pro Cab 2x12	949.00	
Pro Cab 4x12	1499.00	

** RS (Red Stealth) is a modified version of standard Duality. It involves 6L6s power tubes and modified overdrive channels. We can define it a tighter, with more gain, upper frequencies and a little less mid frequencies version of standard D50/100.

Tailor Made Project

Our team, always ready to accommodate any request, it's always looking for the next step, innovating, combining materials and searching for new technologies.

If the classic "all black" looks boring to the eyes, we have various proposal you can choose from, for example:

- Custom tolex colors;
- Custom tolex color and print (we can print your own design on your new RedSeven amplifier, yes!);
- AAAAA figured wood, front panels or even more crazier full headshell build;
- Custom color for chassis available;
- New devices and custom amps are now available.

TMPs could take between 30 to 90+ working days to be made. All TMPs are made exclusively in Italy, as per any other product, with the difference there's no stock for TMPs. For place an order you can contact your local dealer or our product specialists at usa@redseven-amplification.com

Are you a professional and want to become an authorized RedSeven Amplification dealer? Contact us at: usa@redseven-amplification.com
